Your Tips & Tricks

- 01** Keep a simple cycle calendar together — normalize tracking early without making it clinical.
- 02** Introduce fragrance-free, gentle skincare now, before breakouts start, not after.
- 03** Protect her sleep window — no screens 30 minutes before bed sets a foundation that pays off for years.
- 04** Normalize movement as fun, not fitness — dance, walking the dog, and bike rides all count.
- 05** Keep the conversation door open with low-pressure check-ins rather than one big "talk."
- 06** Revisit this assessment every few months — bodies change fast at this age.
