## Your Tips & Tricks

---

- 01** Swap to a breathable, cool pillowcase if night warmth or restlessness is new.
- 02** Introduce a wind-down tea ritual to signal bedtime to a system that's recalibrating.
- 03** Address breakouts with gentle, dermatologist-formulated products — not aggressive acne treatments.
- 04** Validate mood swings out loud: hormones can make even small things feel huge right now.
- 05** Add a diffuser with calming scents to her room for the harder weeks.
- 06** Book a check-in with a provider experienced with adolescent hormonal health if symptoms feel bigger than "normal."
